

REQUEST FOR QUOTE (RFQ) - STATEMENT OF WORK (SOW): Amendment 2

Montana Army National Guard (MTARNG) - Helena Armed Forces Reserve Center Auditorium

1. OBJECTIVE

- 1.1. Upgrade components and wiring of the auditorium audio visual suite in order to move to the most current technologies, and to eliminate unneeded equipment.

2. BACKGROUND

- 2.1. The Helena Armed Forces Reserve Center auditorium is an approximately 4,000 square foot area (61 feet by 71 feet) that is used for video presentations, classes, town hall style meetings, symposiums and ceremonies. The north end of the area has a stage, a storage room and a mechanical room. On the east side of the area is a glass panel room that houses the computers, connecting electronics and controls for the presentations. Seating is done by using up to 225 chairs placed in rows on the main floor. The chairs are stored in the storage area. See attached blue prints for basic room setup.
- 2.2. The area can be divided into 3 rooms using dividers that run along tracks in the ceiling. These are stored against the walls and when opened anchor to a pillar in the center of the area. There is also an older 42" television attached to the pillar facing the stage. This television is used for displaying speaker's notes when doing presentations.
- 2.3. The current equipment is integrated into a Crestron control panel. Listed below is the current equipment:

- 2.4. The control room contains 2 computers and a portable rack that contains all the cables and hardware components that allows for VGA and Audio connection. All video inputs and outputs, audio levels and screens can be controlled from the Crestron touchscreen.
- 2.5. Currently we are using VGA and 2.5 mm audio connections, which are limited to analog data. While the projectors have been upgraded to use a digital signal, the use of VGA limits the signal to analog and limits the picture quality.
